Re-Piping

Financial Advantage, Decreased Service Calls, Better Plumbing.

Interested in J-51 tax benefits and/or MCI rent increases?

Tired of repeated leaks and the cost associated with constant restoration?

DeWaters Plumbing & Heating has specialized in re-piping occupied buildings in New York City for 50 years.

Since Our Founding in 1955, We Have Completed 100's of Complex Re-piping Projects in NYC. During the last 50 years the Company has built a strong reputation for solid experience, quality re-piping projects and professional execution. From large multi-story Manhattan coops to portfolios of rent stabilized buildings, we've done it all.

Long Serving, Highly Trained Work Force. DeWaters senior personnel have over 250 years of cumulative licensed re-piping experience in the City of New York. Our firm currently carries in excess of 10 plumbing and specialty licenses and many of our employees have worked with us for more than 20 years.

Unit Access Through Diplomacy. Diplomacy? We've learned that one of the most challenging issues we face in completing our re-piping projects is unit access. We assure that entry compliance is maximized and intrusion is minimized through employing a comprehensive program of employee training, tenant explanation and timely notification.

Many Long Term Relationships. We have built a substantial and diversified long time client base by being customer focused. Most of our re-piping contracts result in referrals because we listen to and understand our client's complex needs.

Call us today, and let us demonstrate the advantages of repiping your building.

Experience. Quality. Professionalism.
